

*PDO & PLLA THREAD  
P(LA/CL) THREAD  
LIFT YOUR SKIN  
& CONFIDENCE  
WITH aqualift*

## TIME TO STOP AGING WITH aqulift

aqulift consists of needle and Polydioxanone(PDO) or Poly-L-Lactic Acid(PLLA) thread. aqulift is intended for being inserted into skin, causing artificial wound. It induces healing effect of the body itself followed by tightening and lifting effect. The safety of the threads are verified as they have been used sewing wound in normal hospitals since 2001. Also they are biocompatible and biodegradable.

## WHY aqualift IS THE BEST

### NEEDLE

35 degree hard silicon coated needle eases the pain and insertion

### THREAD (SUTURE)

Made by Samyang corporation, the top quality and safety in the world. The total length of thread is longer than other brands

### PERFECT PROCESS

Sterilization, dry, vacuum packing, nitrogen gas for the high-end quality of thread which is so sensitive against air, temperature and humidity

### SHELF LIFE

2 years
