

Z-LIPO^{PRO}

Body Contouring

Treatment areas

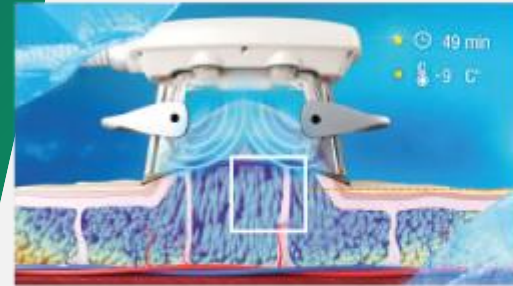

Feel The Difference

- Fat deposits on the abdomen
- Fat deposits on the hips (love handles)
- Fat deposits on the upper and lower back
- Fat deposits on the inner and outer thighs and the knee area
- Fat deposits on the chin
- Fat deposits on men's chests

Applicators are available in various sizes in order to enable efficient and effective treatment. Simultaneous use of two applicators cuts treatment time. As the two applicators can be used completely independently of one another, two different parts of the body can be treated at the same time. Treatment can be started on the screen and directly on the applicator. Other highlights are the modern design of the device and the low costs per treatment.

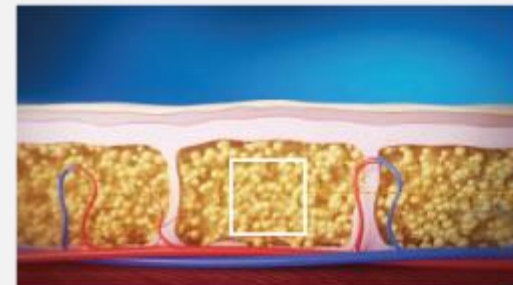

1. Start of Cryolipolysis™

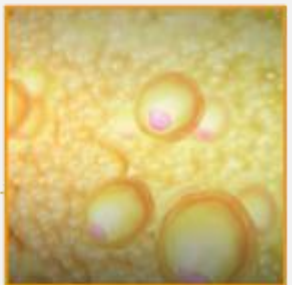

2. Immediate response

3. Breakdown of fat cells

4. The result
