

Skin tightening

Treatment areas

Radial Shockwave Application

Shockwaves, which are in principle compression waves, that work on the tissue are widely used to treat weakness of muscle and connective tissue, striae, cellulite etc. Originally indicated for the noninvasive disintegration of kidney stones, shockwave therapy has since then also been used successfully in aesthetic medicine.

Z WAVE PRO

Skin tightening

Treatment areas

Effects and tissue reactions

- Increased blood flow
- Cell rejuvenation
- Strengthening of the connective tissue
- Flushing out of toxins(lymphatic drainage effect)
- Mechanical lipolysis
- Improvement of scar tissue
- Collagen regeneration
