

PROFESSIONAL LINE FILLERS HYALURONIC ACID

PROFESSIONAL LINE FILLERS

COMPOSITION

Monophasic densified Sodium Hyaluronate. Ideal concentrations and optimal spreading for dermal rehydration, redensification of volumes, first lines and deep folds.

INDICATIONS

RX.HA. range is a viscoelastic solution to correct fine lines or deeper wrinkles and folds, increase or restore volume to the face and to remodel facial contours. It is indicated to be injected into the deep dermis or subcutis.
